Can you test it with aspeqt too?

#2 - 05/30/2017 06:47 PM - foft

- Assignee changed from foft to ndary

#3 - 05/30/2017 11:34 PM - ndary

- File \$boot.bin added

- File picodos.sys added

tested it ASPEQT and confirm that its a problem of the loader..

i used PICODOS from HIASOFT and most games/demos that does not load well with the EclairXL loader works now!!!

so its not a problem with the core but with the loader

ok, another loader issue.

Lets add a new task for changing the xex loader to picodos or another.

PicoDos source is on Github

<https://github.com/Masq666/PicoDOS/blob/master/picodos.asm>

- *Related to Feature #28: XEX boot loader replacement added*

#9 - 06/03/2017 10:54 AM - ndary

- *Tracker changed from Bug to Feature*

notice that if you hold the OPTION KEY (F8) before selecting the file, it load correctly, thus i believe we need to add a feature in the settings to DISABLE BASIC ON/OFF

Nir

#10 - 06/03/2017 12:20 PM - foft

Its the same as the 800xl, portb disables basic and the os changes portb when holding option. Of course you can change the os if you want the reverse.

#11 - 06/03/2017 12:23 PM - foft

- *Status changed from New to Closed*

Closing, not a bug with the loader. Just need to hold option to disable basic as usual!
