Description			
When connecting a D-PAD Joystick to one of the USB ports the screen goes black! the computer still works and even boots but with no screen.			
i tried to use one of my USB joystick (Retronic ATARI 2600 Style, PS/2 USB Style, Standard USB DPAD) with the EclaireXL mainboard but as soon as i plug it it the screen goes black

History

#1 - 05/31/2017 06:50 PM - foft

Is the VGA cable still connected?! Will dig out mine but I've not knowingly changed this. I wonder if I accidentally cross connected the video settings and the usb joystick or something...

#2 - 05/31/2017 06:53 PM - foft

- Priority changed from Normal to High

#3 - 05/31/2017 06:57 PM - foft

- Tracker changed from Feature to Bug

#4 - 05/31/2017 07:50 PM - ndary

yes VGA is still connected, it also happen with HDMI screen

#5 - 05/31/2017 08:23 PM - foft

Confirmed. I saw video settings had changed after disconnection too.

#6 - 06/02/2017 10:28 AM - foft

I checked the code and I'm using zpu_out5 for both joystick and video mode!

#7 - 06/02/2017 09:29 PM - foft

Switched this to another output so it should no longer crash in next release

#8 - 06/02/2017 10:23 PM - foft

Confirmed good as of pbiv28.sof. This release is almost ready for v9.sof, but some issues to fix first...

#9 - 06/02/2017 10:49 PM - foft

- Status changed from New to Closed

Decided to call pbiv28 v9... Closing as complete.
